## Not All Face Protection Is Alike: Gateway Safety's Venom™ Line Offers Superior Protection That Tames Hazardous Work Environments

February 3, 2009—Lightweight and comfortable, Venom™ Face Protection provides workers with formidable protection against workplace hazards.

Venom's contemporary design is a worker favorite, with an economical price that fits any budget—dramatically improving employee compliance rates, while reducing the cost of PPE for employers.

Venom Visors and the Venom Headgear unit are available separately or as a Combo-Pak, and are all ANSI Z87.1+ certified and CSA Z94.3 certified by Underwriters Laboratories.

Venom Visors are made of a .060" thick polycarbonate material that's been molded into a "fang" shape for complete facial coverage. Venom Visors are available in clear, clear anti-fog, and gray, as well as 3.0 and 5.0 IR Filter shades for excellent protection when cutting, brazing, or gas welding.

The Venom Headgear unit has an extra-soft brow pad and nape strap and features a three-part comfort adjustment system, making Venom the brand to choose for extended or even all-day comfort. The easy-to-use tension adjustment ensures that visors will stay in place when raised.

Gateway Safety, Inc. designs and manufactures award-winning, cost-effective personal protection equipment. Product categories include eye, face, head, hearing, and respiratory protection. For more than 60 years, it's been Gateway Safety's mission to help employers increase safety compliance and improve the overall welfare of their employees by making safety products that workers want to wear—which, in turn, helps companies reduce the high costs associated with workplace injuries.
