

New! Cover2™ Protective Eyewear: A Modern Design and Extra Comfort Features Finally Offer Prescription Eyewear Users An Attractive Option.

Ideal for smaller faces and use with contemporary prescription eyewear

February 2010—Workers who are tired of the big, bulky and out-of-date designs of traditional over-the-glasses options finally have an alternative. Gateway Safety® is proud to introduce Cover2, an OTG solution that's significantly more stylish and comfortable than currently available products. With Cover2, Gateway Safety has found the perfect balance between safety, style, and comfort. This balance will be popular with workers, which will help improve compliance.

Compared to other OTG products, the sleek, compact design is extremely attractive. Plus, the lightweight lens and soft, flexible temple tips marry well to offer serious comfort. Featuring an impact-resistant polycarbonate lens, Cover2 offers unyielding impact protection and a wide, unobstructed field of vision. It meets or exceeds the ANSI Z87.1+ and CSA Z94.3 standards, and blocks more than 99.9% of UV-A and UV-B light.

A cost-effective alternative to prescription safety eyewear, Cover2 is available with a clear or gray lens.
